**Write your review.**

Comment on the following problem:

**Elderly people who live alone should be taken care of.**

57

**Write 100–120 words.**

I think that people need to be taken care of. We must help our family. Old people, who live alone, need help too. It's hard for old people to take care of themselves. I think that modern technologies can help in this. I suppose that elderly people who live alone should be taken care of.

All will be well when the lonely old people will be safe. The information, which give in the article, is very interesting. The problem is topical. It's good that technology can be used to the advantage. I do not like the violation of privacy. This information must be protected.

I think that elderly people who live alone should be taken care of. People need to take care of others. Modern technologies can be used with advantage. There is little doubt that technology impacts the world to a startling degree. Some of the impacts of modern technology are positive, but others are not. I think it's good that the technologies will be used to help old and lonely people. We all want our future to be good.
